KP GROUP GOES GREEN, EXPANDS ACROSS INDIA AND BEYOND

From an aerial perspective, India's landscape reflects momentum and ambition, KP Group is advancing this narrative through clean energy and manufacturing. With three listed entities, its footprint spans multiple geographies. Recent milestones include a 1 MW green hydrogen plant in Bharuch and Asia's largest galvanising kettle at Matar, integrating sustainability into operations. The Group operates 128 sites with a ~7.7 GW portfolio and aims to exceed 10 GW by 2030, reinforcing its focus on scale, execution and green growth.

KP Group Installs First Green Hydrogen Plant

KP Group, with three listed companies – KPI Green Energy, KP Energy, and KP Green Engineering – is expanding its footprint. Among KP Group's recent milestones is the installation of its first 1 MW green hydrogen plant at Bharuch, Gujarat.
